NOTIFICATION

Dear Customers,

Since 2011, ARTIC INDUSTRIE has been committed to promoting natural refrigerant solutions for air chillers.

Today, we are proud to announce a new partnership with EQUIUM.

We are pleased to inform you that EQUIUM and its CEO, Cedric François, have signed a mutual cooperation agreement for the future development of acoustic cryogenic solutions.

As part of this collaboration, EQUIUM and ARTIC INDUSTRIE will jointly test a natural refrigerant solution using helium at our facilities in France. The system is designed to provide approximately 6 kW of cooling capacity, operating within a temperature range of -80°C to -90°C on the cold side and $+40^{\circ}\text{C}$ to $+50^{\circ}\text{C}$ on the hot side.

We intend to promote and market this innovative solution throughout Europe and Africa via our international distribution network.

We are confident that this partnership will further strengthen and showcase French technological expertise while supporting the continued development of innovative and sustainable refrigeration solutions.

Kind regards,

Laurent PEPIN
